## Awards

## Portfolio Objective

The Climate Action portfolios have been designed with a dual mandate, to maximise financial returns and contribute to a low carbon economy. This strategy selects funds that invest in companies providing environmental solutions and driving transition in the Path to Net Zero, while avoiding controversial sectors. The strategy is comprised of specialist, actively managed and passive tracker funds. This Adventurous portfolio is diversified across a mix of equities, fixed income and cash.

## Portfolio Performance\*

Cumulative Performance (%)	3M	6M	1Y	3Y	Since Inception 02/2022
EQ Climate Action Adventurous	-7.80	-12.80	-5.78	26.30	-4.75
UK CPI	3.86	5.70	9.25	12.67	4.99

Discrete Performance (%)	Jul 21 Jun 22	Jul 20 Jun 21	Jul 19 Jun 20	Jul 18 Jun 19	Jul 17 Jun 18
EQ Climate Action Adventurous	-5.78	22.98	9.00		
UK CPI	9.25	2.51	0.60		

Volatility (%)	1Y	3Y	Since Inception 02/2022
EQ Climate Action Adventurous	-	-	-
UK CPI	2.34	1.85	-

## Our Commitments

At EQ Investors we invest in Environmental, Social and Governance (ESG) standard industry leaders, and companies whose products and services help achieve the UN Sustainable Development Goals. We are proud to be a Certified B Corporation (B Corp) and signatories to many important initiatives including the UN Principles for Responsible Investing, the Impact Management Project, ShareAction, and the Global Impact Investing Network.

As a business, we recognise the global climate emergency and we have committed to become a net zero carbon emission business by 2030.

Past performance is not a reliable indicator of future performance. All performance is shown in sterling, net of EQ's management fee (0.59%) and underlying fund charges. It does not include platform or adviser fees. UK Consumer Price Index (CPI) is a measure of domestic inflation. Due to significant lag on CPI valuation, the previous month's figure is carried over to the latest month. Source: EQ, Morningstar.

## Asset Allocation

The chart below shows the short-term asset allocations of the portfolio. Percentages are subject to rounding.

## Top 5 fund holdings

	Description	Weighting
M&G Global Sustainable Paris Aligned	Global companies contributing towards the Paris Climate Agreement	12.0%
Davy Low Carbon Equity	High quality companies with a high level of adaptation to climate change.	12.0%
Lyxor Net Zero 2050 S&P 500 Climate PAB ETF	North American stocks with a low carbon emissions Paris Aligned overlay.	11.8%
Amundi MSCI USA SRI PAB Index	North American stocks with a sustainable & Paris Aligned overlay.	11.5%
Aviva Climate Transition Global Equity	Companies involved in climate change solutions or low carbon transition.	6.8%

## Top 10 underlying companies

	Description	Weighting
Microsoft	💡 Provider of cloud infrastructure, enabling decarbonisation of its clients	3.1%
Alphabet	🌍 Provides cloud computing and software, and is a low carbon leader	2.3%
Schneider Electric	💡 Provider of sustainable energy and efficiency technology	1.1%
UnitedHealth Group	🌍 Healthcare and insurance provider, and a low carbon industry leader	1.1%
American Express	🔄 Global payment and credit card provider, committed to SBTi	1.0%
NVIDIA	🌍 Leader in GPU design and chip systems for gaming, vehicles, and robotics	0.8%
Unilever	🔄 Global consumer goods company with leading climate targets verified by SBTi	0.8%
Home Depot	🌍 Home improvement retailer with low carbon operations and building materials	0.8%
Visa	💡 Retail electronic payments network, and a low carbon industry leader	0.7%
Manhattan Associates	💡 Global solutions provider for supply chain leaders	0.7%

The top 10 underlying equity holdings represent the top 10 equity exposures held in an aggregated list of each funds' underlying holdings in the portfolio. Multiple issues of a single company are aggregated in this list. Icons represent the overall company alignment to our Climate Buckets. To produce this data, we use a snapshot of the funds held at the last rebalance.

## Optimising Climate Exposure

Alongside investing in Low Carbon Leaders, investment in the climate transition and in climate solutions can be a catalyst for further change by signalling to companies and governments that this is priority for owners of capital.

Companies that provide solutions to climate change are likely to experience a strong increase in revenues by solving unmet needs. In the meantime, companies that are not transitioning quickly enough to a low carbon economy are likely to suffer write-downs, a potential drop in future revenues, and a rise in operating cost as the impact of regulatory instruments such as carbon taxes begin to bite into bottom lines.

Climate exposures reference the equity portion of the portfolio only. Percentages may not add up to 100% as they are rounded to the nearest decimal. All percentages are rescaled to exclude any unmapped exposures.

## Portfolio climate comparison to Global Equities & UK Equities

## Science Based Targets (SBTs)

Launched in 2015, the Science Based Targets initiative (SBTi) has been the gold standard for Net Zero emissions targets and is backed by four prestigious global bodies\*.

The initiative intends to increase corporate ambition on climate action by mobilising companies to set greenhouse gas emission reduction targets consistent with the level of decarbonisation required by science to limit warming to less than 1.5°C / 2°C compared to preindustrial temperatures.

The chart alongside shows the EQ Climate Action Balanced portfolio's company alignment to the SBTs. At EQ our Climate Action portfolios are committed to becoming 50% aligned by 2025 and 80% by 2030.

\* Carbon Disclosure Project (CDP), UN Global Compact (UNGC), World Resource Institute (WRI) and World Wide Fund for Nature (WWF).

To produce this data, we use a snapshot of the funds held at the last rebalance. Underlying fund holdings are updated on an annual basis in July. New funds added to the portfolio use the latest holding data available at the time. Percentages may not add up to 100% as they are rounded to the nearest decimal. Portfolio data may differ depending on the platform used.

## Carbon Footprint

Data source: MSCI, Analysis: EQ Investors, data as at the last rebalance.

% reduction in carbon emissions vs UK Equities

**-63.5%**

£100,000 GBP invested in the EQ Climate Action Adventurous portfolio implied an annual emissions reduction of 27 tons of carbon dioxide equivalent, compared to investing the same amount into UK Equities.

The difference in reduction is equivalent to the annual emissions of:

- 6 average passenger cars driven within one year;
- 7 UK household's energy use within one year; or
- 3.0 thousand gallons of gasoline burned.

## Climate Change Scenarios

Climate change's current path is still uncertain, and depends on how fast the global economy responds to the challenge to cut global carbon emissions - which are the main driver of global climate change. It is therefore relevant to understand whether the companies within a portfolio are aligned to a desirable emission reduction pathway for us. Climate scientists and global leaders have agreed that limiting global temperature rise to 1.5°C is the most desirable and yet realistic scenario.

## Potential Emissions from Fossil Fuel Reserves

Currently, only 20% of the Earth's existing fossil fuel reserves can be burned while limiting global warming to the 1.5 degrees target by 2050, making the rest un-usable. To compare fuel reserves, we express potential emissions to greenhouse gas emissions as tons of CO<sub>2</sub>.

Certain fuels such as thermal coal, oil sands, shale oil/gas have a higher carbon content than other types. In addition to carbon intensity, extraction can be costly and climate unfriendly because of geological, technical and environmental challenges.

Data source: MSCI, Analysis: EQ Investors, data as at the last rebalance.

To calculate the alignment for 'Global Equities' and 'UK Equities', we use data from ETFs tracking the performance of MSCI ACWI and FTSE 100, respectively.

We use an industry standard methodology, which lets us associate the tonnes of CO<sub>2</sub> equivalent emitted per 1m GBP invested, scaled down to 100,000 GBP invested. We use the "Financed carbon emissions method", using Enterprise Value including Cash (EVIC) as recommended in the PCAF carbon accounting standard<sup>1</sup>. We only focus on the equity portion of the portfolio to enable comparability with a standard market index, and include direct and indirect carbon emissions from the businesses (Scope 1, 2 and 3 as defined by the greenhouse gas protocol)<sup>2</sup>.

This factsheet constitutes neither an offer, solicitation, nor investment advice to buy or sell any security or any other investment or product. It should not be reproduced or distributed in any format without EQ's prior written consent. The information in this factsheet is for illustrative purposes only and while believed to be correct, no representation or warranty, expressed or implied, is given as to its accuracy or completeness. Percentages may not add up to 100% as they are rounded to the nearest percent. EQ Investors Limited ("EQ"), its partners and employees accept no liability for the consequences of you or your advisers acting upon the information contained herein. The Portfolio aims to rebalance quarterly during Feb, May, Aug and Nov, but is not limited to these dates.

\*The value of investments and income derived from them may fluctuate and investors may not get back the amount originally invested. The performance of portfolios linked to this model may differ from the model itself, due to the variation in timing of the initial and subsequent investments. This portfolio is not suitable for all investors: investments may only be undertaken based on a recommendation from a financial adviser.

\*\*The MIFID II Ex-Ante charges are forward looking estimates based on the previous fiscal year's information and may vary year to year. 'Ongoing Costs' include adviser, administration, custodian, legal and other fees that typically do not vary year to year. 'Transaction Costs' include the costs of buying or selling assets for the fund. 'Incidental Costs' include performance fees. For newly launched funds that do not have historical data available, the Ex-Ante figure is estimated. The fund charges shown are based on the share classes available on the Pershing platform: charges may vary across platforms based on share class availability.
