Allianz Global Investors Fund - Allianz Green Bond Share Class P2 (H2-GBP)

Managed by Allianz Global Investors GmbH, part of Allianz Global Investors

Objectives and Investment Policy

Long-term capital growth by investing in investment grade rated Debt Securities of OECD, EU, Brazil, People's republic of China (including the Hong Kong and Macau Special Administrative Regions), India, Indonesia and South Africa bond markets denominated in currencies of OECD countries with a focus on green bonds. Green bonds' issuers address environmental solutions and/or support efforts to reduce their own environmental footprint.

Min. 85% of Sub-Fund assets are invested by us in Green Bonds as described in the investment objective. Min. 80% of Sub-Fund assets are invested in bonds with a good credit rating. Sub-Fund assets may be completely invested by us in Emerging Markets. Max. 15% of Sub-Fund assets may be invested by us in bonds other than described in the investment objective. Max. 10% of Sub-Fund assets may be invested by us in ABS and/or MBS with a good credit rating. Max. 25% Sub-Fund assets may be held in deposits and/or may be invested directly in Money Market Instruments and/or (up to 10% of Sub-Fund assets) in money market funds on a temporary basis for liquidity management and/or defensive purpose. Max. 10% non-EUR Currency Exposure. The duration of the Sub-Fund assets shall

be between zero and 8 years.

Exposure to the base currency of the fund (EUR) will be hedged to a large extent against the reference currency of the shareclass (GBP) which reduces the potential risks and limits potential gains from exchange rate movements.

Due to its investment strategy we expect a high volume of transactions which results in higher transactions costs reducing the return of the fund.

You may redeem shares of the fund usually on each business day.

We usually distribute the income of the fund on a yearly basis.

Recommendation: the Share Class of the Fund should be held for at least a medium-term investment horizon.

Derivatives may be used to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage).

We may invest directly or indirectly a significant portion of the fund into bonds or money markets instruments. If the issuer may fall into insolvency or may suffer economical problems the interest and/or the capital of these assets may not or may not be completely paid and/or the price of the assets may drop.
