EQ Investors Positive Impact Adventurous Plus	8
EQ Investors Positive Impact All Equity	9

Assessment

The Defaqto methodology involves using both quantitative and qualitative inputs to risk rate a portfolio:

Input 1 - Forecast the portfolio's future volatility

Input 2 - Discussion with the portfolio manager

Since our profiles are overlapping and not contiguous, we have some discretion as to whether a portfolio is rated in the upper or the lower profile.

Our assessment has been considered by our Investment Committee, and has taken into account some of EQ Investors Positive Impact's suggestions when arriving at our Risk Ratings.

Investment Committee summary

Stochastic (future) volatility

Our analysis has been based on holdings data provided by EQ Investors Positive Impact.

EQ Investors Positive Impact Defensive

Risk Rated on 04 December 2025

Mandate

The portfolio maintains a bias towards lower volatility investments with equity holdings limited to 40%. It focuses on capital protection with a moderate participation in equity market growth, and aims to reduce investment risk by diversifying across regions and asset classes.

Investment Committee Notes

We used portfolio holdings supplied by EQ Investors Positive Impact to calculate all stochastic measures. Through discussion with EQ Investors Positive Impact in which the Defaqto methodology and their approach were considered, both Defaqto and EQ Investors Positive Impact believe that this portfolio is most appropriately risk rated as a 2.
